

SECURITY, SAFETY & SUPPORT

Pipelines are widely acknowledged to be the safest and most efficient way to move energy products overland for long distances. Keystone XL is designed to be a state-of-the-art pipeline that will help diversify our energy supply and encourage domestic energy production.

INCREASING NORTH AMERICAN ENERGY INDEPENDENCE

With KXL, the U.S. could move toward replacing 830,000 barrels a day of imports. That's equivalent to almost

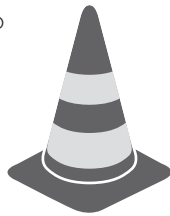

of what the U.S. imports from the Persian Gulf.
